Only the Papillomavirus assays are conventional PCR assays (not real-time/quantitative PCR). No quantitative estimation will be provided in case of a positive result for these analyses.

**Expedition**

to **Laboratoire Scanelis** - 9 allée Charles Cros - CS 70006 - 31771 Colomiers Cedex - FRANCE

to **LAPVSO**  
address on the **DualDiag** form

**Turnaround-time for results**

- Standard Processing** - guaranteed turnaround-time: **D + 2** from receipt\* of the samples
- Urgent Processing** (+ 10.83 €) - guaranteed turnaround-time: **D + 1** from receipt\* of the samples

**D+ 3**  
from receipt\* of the samples

\* for any file received before 10am on the D-day, including necessary information for registration; on condition of analysability of the received samples

**PCR SAMPLES**

Fluids on EDTA

Minimum volumes

Blood, abominal/thoracic fluid: 0.5 mL

Bone marrow: 0.1 mL

CSF, aqueous humor: 0.3 mL

Urine, BAL: 4 mL

Cells on swab/cyrobush in a plain tube

**Never use heparine tubes** (even for swabs/cytobrushes)

Unless you clearly specify not to do it, several samples from the same animal, sent simultaneously, may be pooled before analysis.
